RE: City of Altus, Oklahoma FY 2020 BUILD Grant Application

Dear Ms. Chao,

I am writing this letter in support of the Altus Economic Loop project currently under consideration by the City of Altus and Jackson County, Oklahoma.

Our company is located on the west side of Altus with access to our facilities and property primarily off Market road and Bradford Street. We experience a high volume of trucks delivering cottonseed to our location from October through March of each year and then a substantial amount of outbound trucks the rest of the year.

The current access to our business is difficult for semi trucks to navigate due to the condition of the roads and intersections off Market Road and Bradford Street. The Altus Economic Loop would substantially improve the accessibility for our customers both inbound and outbound. We want to grow our business and the infrastructure improvement will be essential to our ability to operate more efficiently.

We anticipate the expansion of cotton acres grown in Oklahoma over the next few years that we have access to from our location in Altus. The construction of the Altus Economic Loop will really help with our plans to grow our business.

Sincerely,

Austin Rose
